

Winning the '20s: The Organization of the Future

Martin Reeves, Global Director, BCG Henderson Institute

CORPORATE RESEARCH FORUM, OCTOBER 2019

Worst time to be average

Five-year forecasts of global GDP growth (%)

Note: Projections from fall IMF outlooks of each year, except 2019 (from April outlook)
Source: IMF, BCG Henderson Institute analysis

No time for complacency

TOP GLOBAL COMPANIES BY MARKET CAPITALIZATION

2009

- #1 PetroChina 
- #2 Exxon Mobil 
- #3 Microsoft 
- #4 ICBC China 
- #5 BHP Billiton 
- #6 Walmart 
- #7 CCB 
- #8 Petrobras 
- #9 HSBC 
- #10 Alphabet 

2019

- #1 Microsoft 
- #2 Apple 
- #3 Amazon 
- #4 Alphabet 
- #5 Facebook 
- #6 Berkshire H. 
- #7 Alibaba 
- #8 Tencent 
- #9 Visa 
- #10 JPMorgan 

2029

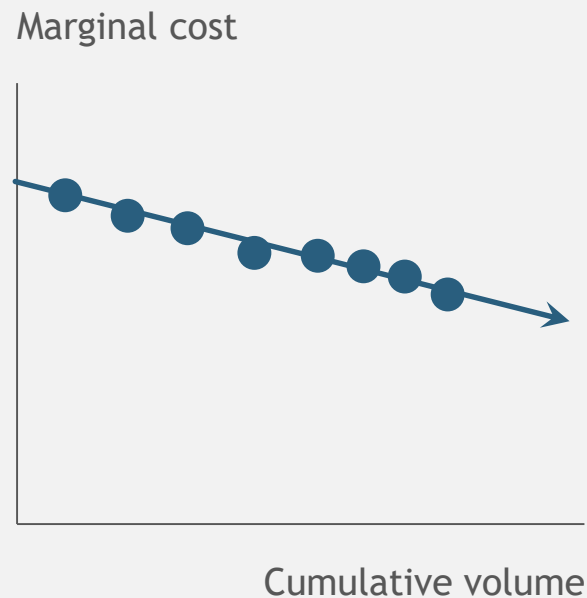

???

Technology driving change at multiple levels

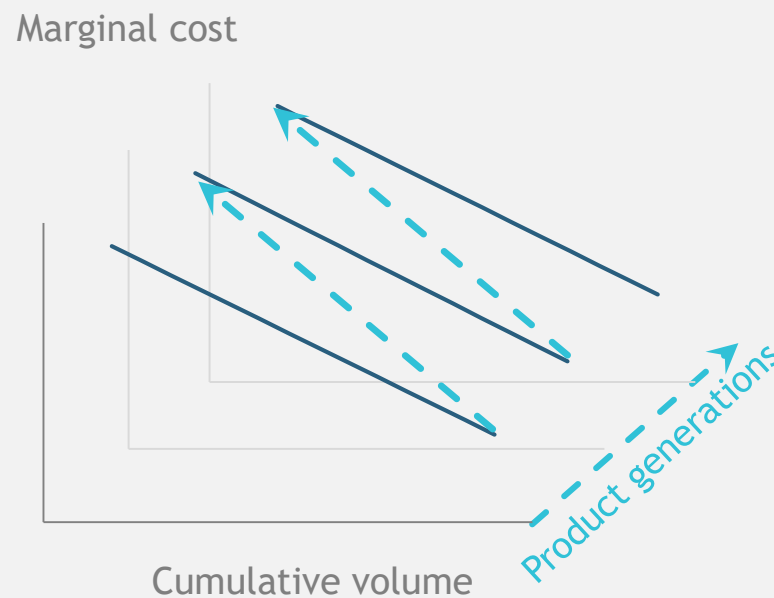

Shift to competing on the rate of learning

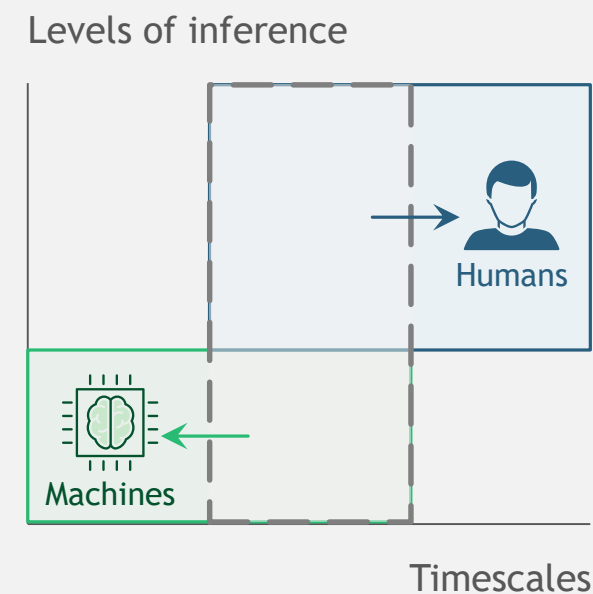

First generation:
The experience curve

Second generation:
"Jumping" between curves

Third generation:
Hybrid learning enterprise

Need to build the organization of the future

- 1 Autonomous learning loops
- 2 Division of labor
- 3 Leveraging ecosystems
- 4 Rethink management

Pioneers embedding learning throughout the firm

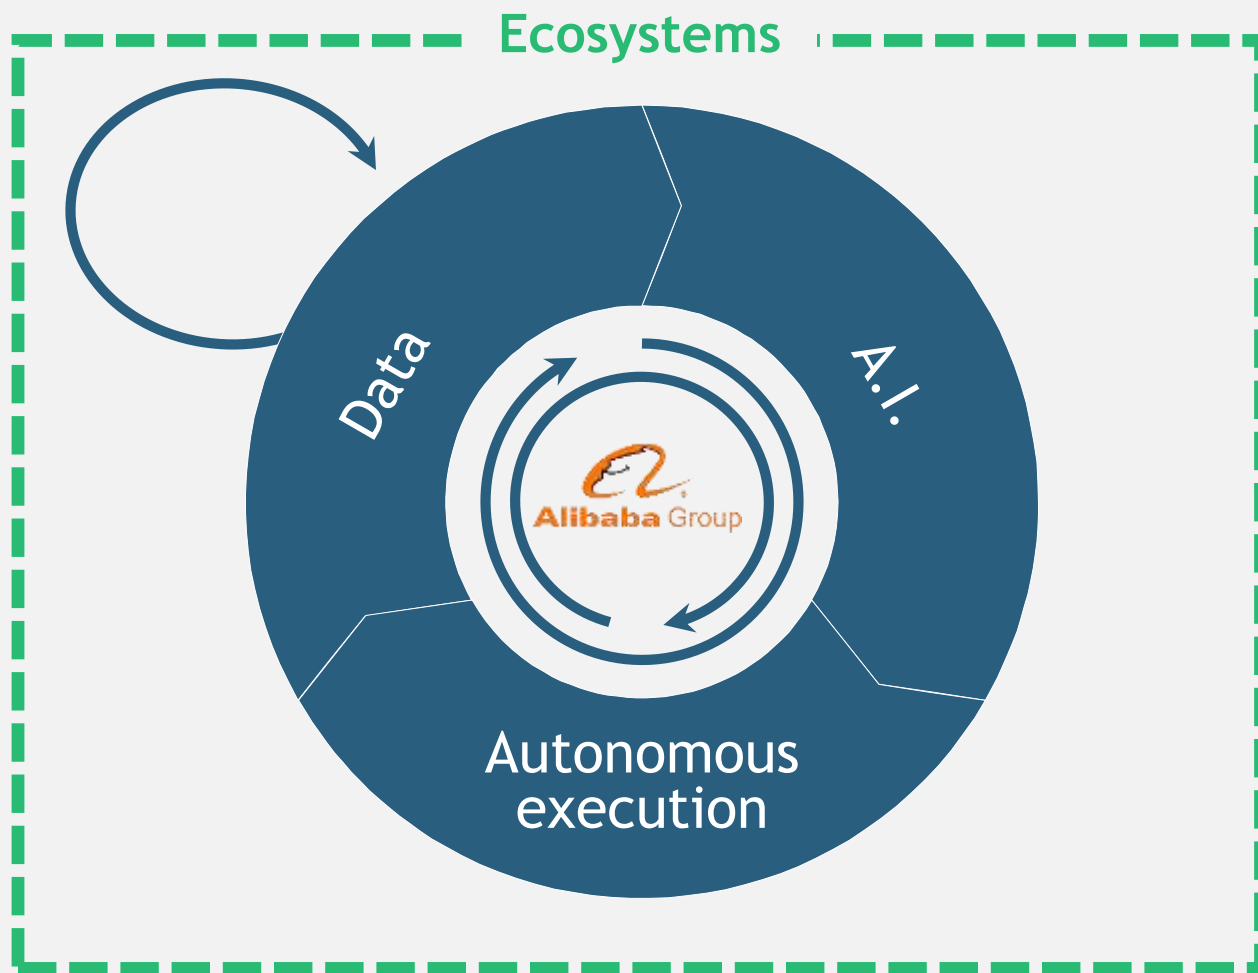

**"Companies need to create digital feedback loops:
connecting data around operations end-to-end;
taking data from one system to optimize another"**
—Satya Nadella, Microsoft CEO

Examples at Microsoft

- “AI-first” organization
- Rise of “workplace analytics”
- Learn-it-all, not know-it-all

Creating “self-tuning” organizations

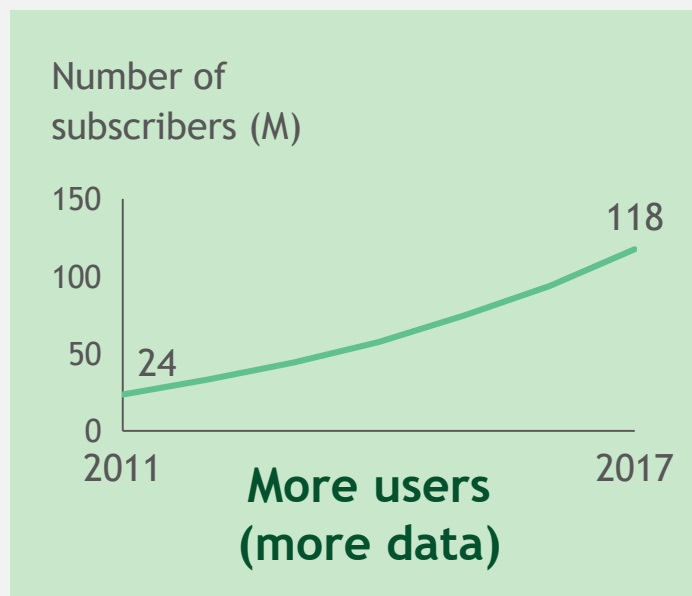

- *Autonomous learning*
- *Experimentation*
- *Removing hierarchy*

Example: Netflix runs on autonomous learning

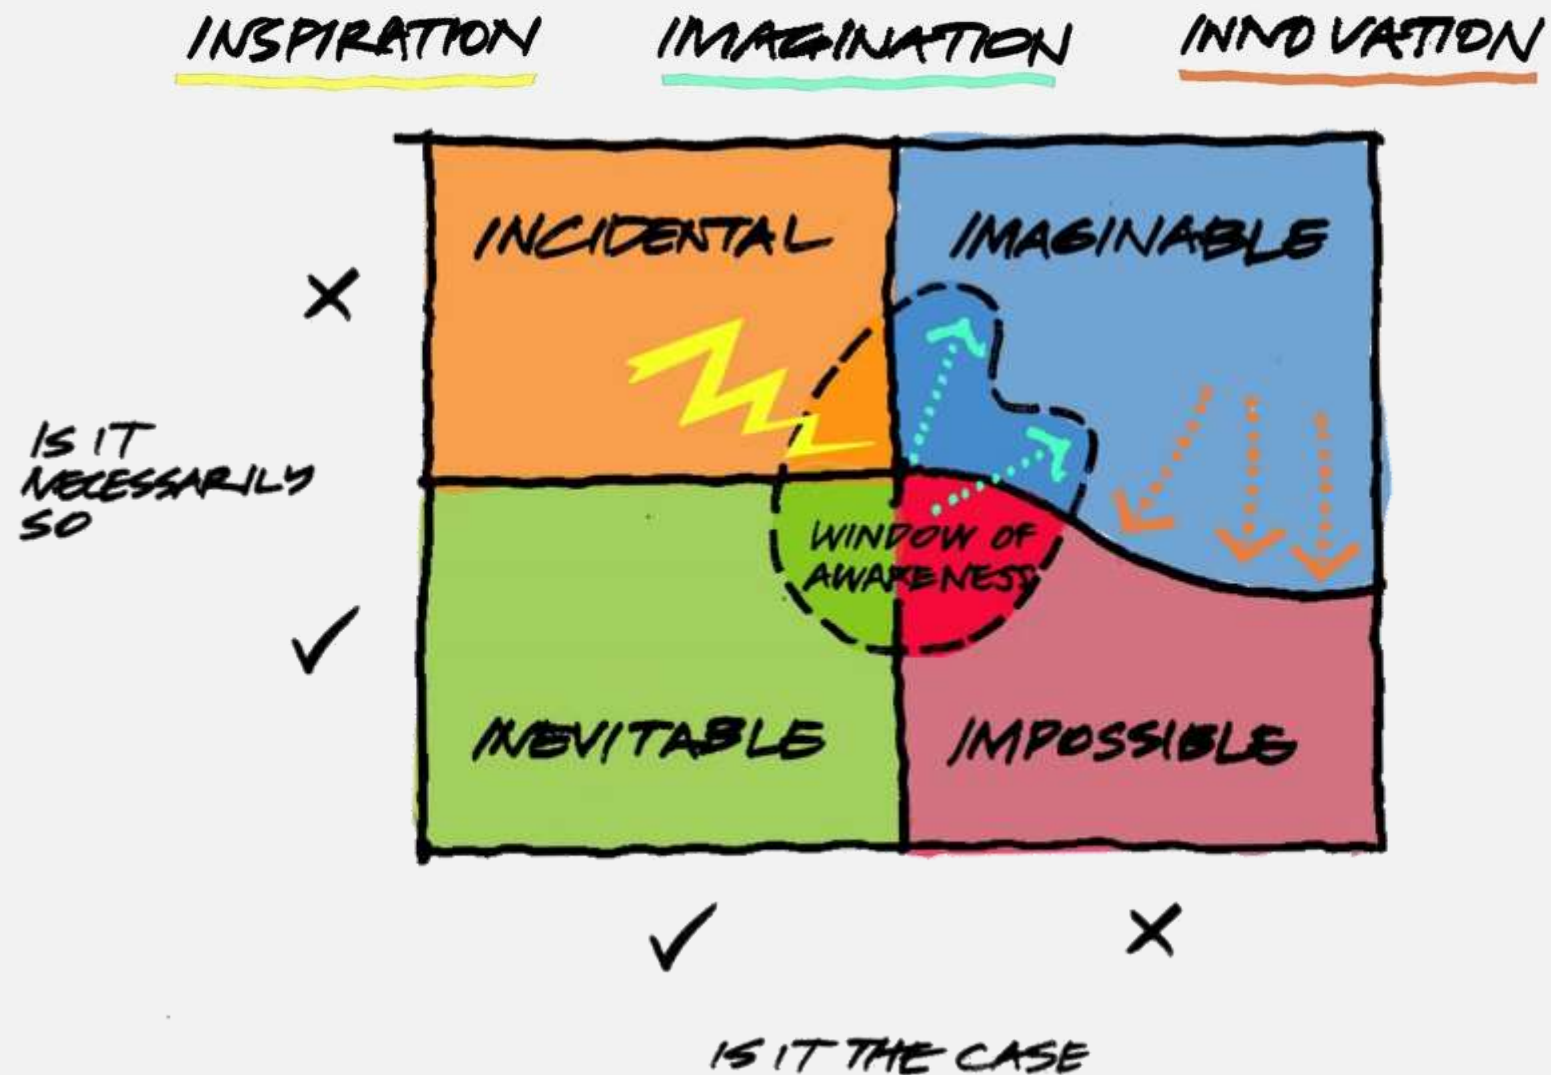

Example:

NETFLIX

1. Based on company releases and news reports
Sources: Company reports; Wired; Business Insider; BCG Henderson Institute analysis

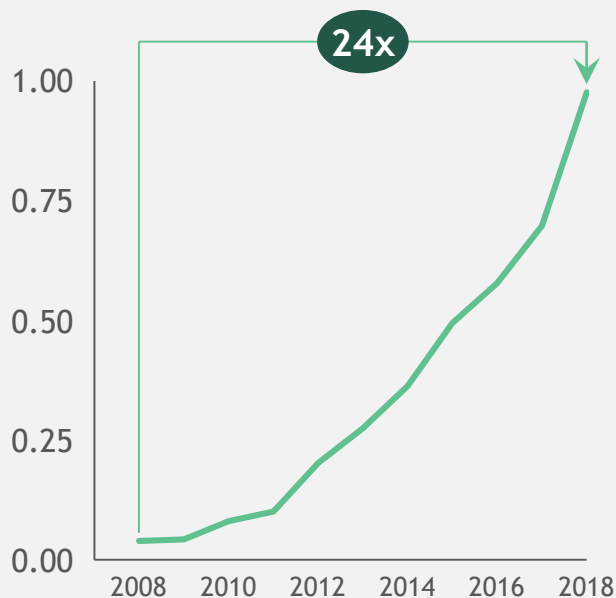

Harness *imagination* to drive growth

Ecosystems: hyped, misunderstood.. and important

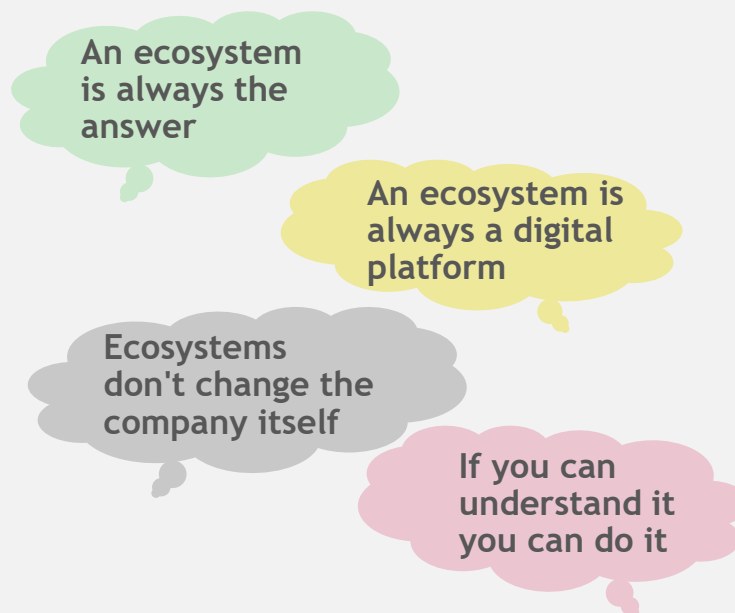

Much hype

Usage of the term "ecosystem"¹

And confusion

Popular myths of ecosystems:

But something real

2013-18 performance (ann.):

1. Number of times the term "ecosystem" appeared on average in an annual report each year (top 2% outliers limit impact of any one company), based on 10-Ks and annual reports for global public companies with \$10B+ sales or \$20B+ market cap 2. Median of US-listed companies > \$10B in market cap 3. 15 of top 50 companies by market cap identified as predominantly ecosystem-driven based on academic literature, partnership data, and financial materiality
Source: "The Myths and Realities of Business Ecosystems," (SMR, Feb. 2019)

Reinvent management and leadership principles

Leveraging indirect,
"soft" power

Algorithm governance

Bringing markets
inside the company

Ambidextrous
leadership

Defying the gravity of size, age and complexity

- Look forward
- Act preemptively
- Self-disrupt

Note: Based on companies with \$10B+ revenue or \$20B+ market cap through year-end 2017, excluding energy, metals & mining and commodity chemicals sector
